VERSION WITH MARKINGS TO SHOW CHANGES MADE

Claims 59, 64-65, and 67-69 have been amended as follows:

59. (Amended) A container comprising:

a generally rectangular bottom[:];

generally rectangular opposed first and second side and end walls extending upwardly from the bottom;

a lid detachably and pivotally secured to the first side wall, the lid having a lid edge; and

a pivot member on an upper edge of the first side wall [wherein] such that when the lid is in a first position, the lid edge is pivotally [secured] attached to the pivot member, [from a point where the lid is in a first position to a point] and when the lid moves to a second position approximately 180° from the first position, [at which point] the lid [is] becomes detachable from the pivot member.

64. (Amended) The container of claim [63] 76, wherein the pivot member includes a plurality of legs spaced along and interconnecting the at least one pivot [pins] pin and the first side wall.

65. (Amended) The container of claim [63] 76, further comprising a plurality of fingers formed on the lid edge to detachably and pivotally secure the lid to the at least one pivot [pins] pin.

67. (Amended) The container of claim [66] 76, wherein the engaging members each include a projection extending outwardly from the lid edge.

68. (Amended) The container of claim [67] 66, further comprising a plurality of engaged members on the pivot member, the engaged members cooperating with the engaging members to prevent detachment of the lid from the container while the lid is in an

orientation between the first position and a point less than [the] approximately 180° from the first position.

69. (Amended) The container of claim [68] 76, wherein the engaged members each include a recess formed on the pivot member.
